Escuelas Profesionales Luís Amigó
Ene. 2017 – Ene 2019

Languages

- Native Spanish
- Native Valencian
- Intermediate English

About me

Full Stack Web Developer with a strong focus on JavaScript. My experience spans both Front End development, where my skills in React with Redux and Context stand out, as well as Back End development, where I have extensive experience in Node.js and Express, along with database management, including MongoDB with Mongoose and MySQL with Sequelize.

My passion for web development drives me to continue learning and adapting to new technologies and agile methodologies. I am enthusiastic about continuous learning and open to exploring new technologies and approaches to enhance my capabilities as a developer.

Work experience

AgroFresh S.A | Electromechanical R&D Operations 2020 – 2023

Responsibilities:

- Tester of industrial quality control software.
- Industrial machinery manufacturing.
- Testing and commissioning of equipment.
- In charge of ensuring that all equipment goes to market correctly.
- Development and assembly of new machinery.

Highlighted projects

Eventum

Eventum is an application designed to optimize and automate the process of creating, managing, and confirming events at Marina de Empresas. Its main purpose is to improve operational efficiency and provide a more convenient user experience for participants who wish to attend our events.
