- Sequelize
- Mongoose

## Languages

- Native Spanish
- Native Valencian
- Intermediate Inglish

## Featured projects

*Eventum*

Eventum is an application designed to optimize and automate the process of creating, managing and confirming events in Marina de Empresas. Its main objective is to improve operational efficiency and offer a more convenient experience to participants wishing to attend our events.

Back End
node MySQL aws

Front End
React Redux Vercel

## About me

As a Full Stack developer, I have acquired solid skills both in the Front-End, where I work with React and Angular, and in the Back-End, where I have accumulated experience using Node.js and Express.

Although I started my professional career in a different industry, such as Industrial Robotics, this allowed me to get to know the world of programming and my passion for web development, which has led me to make a professional transition. My dedication to continuous improvement motivates me to constantly expand my knowledge and contribute in a valuable way to the field of web development.

I consider myself a decisive person, which in my career has manifested itself when facing challenges such as the automation of industrial processes or digitization to eliminate paper from work processes.

## Education

**Full Stack Web Developer(BOOTCAMP)**
- *EDEM – The Bridge*
  **May 2023 – August 2023**
  480 hours of internship in Full Stack Web Development, where I acquired knowledge in the best practices and leading technologies in the job market.

**Industrial robotics technician**
- *Escuelas Profesionales Luís Amigó*
  **Jan 2019 - Jan 2021**

**Electrical and automatic installations technician**
- *Escuelas Profesionales Luís Amigó*
  **Jan 2017 - Jan 2019**

Current studies

**Python PCAP Certification (BOOTCAMP)**
- *Tokyo school*
  **October 2023 - Now**

**Angular + Typescript**
- *Udemy*
  **September 2023 - Now**

## Professional Experience

**AgroFresh S.A | Electromechanical R&D Operations**
*2020 – 2023*

Responsabilities:
- Industrial quality control software tester.
- Industrial machinery manufacturing.
- In charge of ensuring that all equipment goes to market correctly.
- Development of new technologies, methods and equipment to increase worker productivity.
